Acknowledgments

Many persons participated in the various activities of the 1980 census. Primary direction was performed by **George E. Hall**, Associate Director for Demographic Fields, assisted by **Earle J. Gerson**, Assistant Director for Demographic Censuses, in conjunction with **Barbara A. Bailar**, Associate Director for Statistical Standards and Methodology, **Shirley Kallek**, Associate Director for Economic Fields, **James D. Lincoln**, Associate Director for Administration, **Rex L. Pullin**, Associate Director for Field Operations, and **W. Bruce Ramsay**, Associate Director for Information Technology.

Comprehensive classification systems such as presented here cannot be developed adequately without the cooperation of many individuals and organizations. The receipt of such cooperation is gratefully acknowledged.

The index was planned and organized in the Population Division by **John A. Priebe**, assisted by **Paula L. Vines**, under the supervision of **Thomas S. Scopp**, Chief, Labor Force Statistics Branch, under the direction of **Meyer Zitter**, Acting Chief, and **Roger Herriot**, Assistant Chief. The detailed work was accomplished by **Juell T. Young**, **Blanche M. Glascoe**, **A. Theresa Johnson**, **Mary E. Dant**, **Marjorie R. Ward**, **Delores R. Anderson**, **Eleanor J. Wyatt**, **Thomas E. Roberts**, and **Arvella Nelson**.

Formatting and copy preparation were undertaken by the Decennial Census Division under the supervision of **Roger O. Lepage**, Assistant Chief, assisted by **Stephen E. Goldman**.

Within the Publications Services Division, many people made significant contributions in the areas of publication planning and design, editorial review, composition, and printing procurement.

Introduction

INDEX

The Alphabetical Index of Industries and Occupations was developed primarily for use in classifying a respondent's industry (employer's kind of business) and occupation (employee's kind of work) as provided in the 1980 Census of Population, Current Population Survey, and other demographic surveys conducted by the Bureau of the Census during the 1980's.

The index lists approximately 20,000 industry and 29,000 occupation titles in alphabetical order. It is a comprehensive list of specific industries and occupations developed over time and continuously updated through review of census and survey questionnaires.

Each title has been assigned a number or letter code. The code is applied to questionnaire responses on industry and occupation by a coding specialist to provide a key for sorting responses into appropriate industry and occupation classification categories. (The industry and occupation classification systems and each category's code begin on page VII.) Any title can be placed in a category by matching the title code to the category code. To help the index user understand how the titles fit into the classification structure, the titles appearing here in alphabetical order are regrouped according to category in the Classified Index of Industries and Occupations.

Coverage

The basic content of the 1980 index is derived largely from previous editions. However, about 6,000 new occupation titles have been added. Many of these come from the Dictionary of Occupational Titles published by the U.S. Department of Labor, Employment and Training Administration. The industrial classification system for 1980 is similar to the 1970 system. The occupational classification is quite different, however, because the 1980 census occupational classification system is based on the new U.S. standard for occupations.

The index lists industry and occupation titles reported in earlier censuses and surveys, including titles used most often in the economy. However, some titles may not be listed because they are too new to be included in the index. Some rarely used titles are also not included.

Format

The index is divided into two parts: The first covers industries and the second occupations. The individual industries and occupations are listed in alphabetical order and many of them are cross-indexed.

Alphabetization—The titles listed in the index are arranged alphabetically similar to the word system used in telephone directories and encyclopedias. The order of the titles is based on the alphabetical order of one word at a time without regard to subsequent words. This is in contrast to the alphabetic letter system used in dictionaries where the first and second words, if any, are treated as one word. Following are examples of alphabetization within the two systems:

Word System	Letter System
Art dealer (ret.)	Art dealer (ret.)
Art gallery	Artesian wells (const.)
Art supplies (ret.)	Art gallery
Artesian wells (const.)	Artichokes, bottled (mfg.)
Artichokes, bottled (mfg.)	Art supplies (ret.)

Cross-indexing—Most titles in the index contain two or more words. To facilitate coding, many of the multiword titles are listed in all possible orders. However, some multiword titles are listed only once. This is true for 12 "keywords" in the occupational listing selected because they occur frequently. Occupation titles containing these keywords are listed only once under the keyword. For example, one of the keywords is "mechanic." When referring to "auto mechanic," it will not be found under "auto" but under "mechanic." The keywords are:

Apprentice	Manager
Assembler	Mechanic
Assistant	Repairer
Engineer	Salesperson
Helper	Supervisor
Inspector	Teacher

Other multiword industry and occupation titles may be listed only once. For example, the title "Frozen dinners, packaged (mfg.)" is not listed again as "Packaged frozen dinners (mfg.)." If users cannot find a particular order of words in the index, they should try all possible orders of words before deciding that the title is not listed.

Classification Systems

To organize and make understandable the many thousands of industries and occupations, a system of homogeneous grouping is necessary. Titles describing like industries or like occupations are grouped to form the various categories which comprise the system. Each of these categories is assigned a 3-digit numeric or single alphabetic code.[1] In this index each title is identified by the code of the category to which it is assigned. The accumu-

[1] Each alphabetic code has a 3-digit numeric equivalent. Categories with alphabetic codes are those that occur most frequently in the processing. For clerical coding and data keying, the single letter code is more efficient and economical than the 3-digit code. The 3-digit numeric code is used in computer operations.

lation of all the titles assigned to a category (in the Classified Index) constitutes the definition of the category.

Industry classification—The census industrial classification system (page VII) consists of 231 categories arranged into 13 major groups. The industry codes, which are distinct numbers from those used as occupation codes, end with digits 0, 1, or 2 or are one of the letters A-M.

The Standard Industrial Classification (SIC) System, prepared by the Office of Management and Budget and published in the SIC Manual[1], is the standard for industrial classification systems in the U.S. Government. The census system was developed within the frame of the SIC system. The presentation of the census system references the SIC code for each category.

Occupation classification—The census occupational classification system has 503 separate categories arranged in 6 summary and 13 major groups (page X). For occupations, the numeric codes end with digits 3-9 and the letter codes are N-Z.

The Standard Occupational Classification (SOC) System, issued by the Office of Federal Statistical Policy and Standards and published in the SOC Manual[2], will become the standard for occupational classification systems in the U.S. Government. The SOC was first published in 1977 and was developed with the guidance of the Interagency Occupational Classification Committee, of which the Bureau of the Census was an active participant. In developing the 1980 census classification system, it became apparent that the SOC would need reorganization and revision for the census system to meet the data needs of users. Thus a revised version of the SOC will be published in 1980. The census system in this index is based on the revised SOC.

Since work on the two systems is being done concurrently, however, the first edition of this index uses 1977 SOC codes. Later editions will use 1980 SOC codes. The census system beginning on page X gives SOC equivalents.

1980 CENSUS QUESTIONNAIRE ITEMS

The following questions were used to collect information on industry, occupation, and class of worker in the 1980 Census of Population.

The questions relate to the same job. Although the responses to question 28 are used primarily to code industry and those to question 29 to code occupation, in certain cases the responses to these two and question 30 on class of worker are needed to determine the proper code for industry and/or occupation. This is explained in more detail later.

28—30. Current or most recent job activity
Describe clearly this person's chief job activity or business last week. If this person had more than one job, describe the one at which this person worked the most hours.
If this person had no job or business last week, give information for last job or business since 1975.

28. Industry
a. For whom did this person work? *If now on active duty in the Armed Forces, print "AF" and skip to question 31.*

(Name of company, business, organization, or other employer)

b. What kind of business or industry was this?
Describe the activity at location where employed.

(For example: Hospital, newspaper publishing, mail order house, auto engine manufacturing, breakfast cereal manufacturing)

c. Is this mainly — *(Fill one circle)*
○ Manufacturing ○ Retail trade
○ Wholesale trade ○ Other — *(agriculture, construction, service, government, etc.)*

29. Occupation
a. What kind of work was this person doing?

(For example: Registered nurse, personnel manager, supervisor of order department, gasoline engine assembler, grinder operator)

b. What were this person's most important activities or duties?

(For example: Patient care, directing hiring policies, supervising order clerks, assembling engines, operating grinding mill)

30. Was this person — *(Fill one circle)*
Employee of private company, business, or individual, for wages, salary, or commissions ..... ○
Federal government employee ..... ○
State government employee ..... ○
Local government employee *(city, county, etc.)*..... ○
Self-employed in own business, professional practice, or farm —
Own business not incorporated ..... ○
Own business incorporated ..... ○
Working without pay in family business or farm ..... ○

USE OF INDEX IN PROCESSING

Industry Coding

The industry titles are listed in the first section of the index. The titles are arranged alphabetically down the left side of the column and the codes down the right side. The titles normally come from items 28b and c of the 1980 census questionnaire above. At times, however, the coding specialists use information from other parts of the questionnaire to obtain enough detail to match a title in the index. Industry titles are listed several ways.

A. Typical industry entry

Dry cleaning plant 771

Assign code 771 to a questionnaire entry of "Dry cleaning plant."

B. Abbreviations following industry titles—The following abbreviations are used with certain industry titles and are considered an essential part of the title:

(Const.) for such words as construction, building, excavating, etc.
(associated with industry code B)

(Ext.) for such words as extracting, mining, mine, well, quarry, etc.
(associated with industry codes 040-050)

(Mfg.) for such words as manufacturing, factory, mill, plant, etc.
(associated with industry codes 100-392, and C)

(Ret.) for such words as retailing, retail store, retail shop, etc.
(associated with industry codes 580-691, D, E, and F)

(Whsl.) for such words as wholesaling, wholesale company, wholesale store, etc.
(associated with industry codes 500-571)

For example:

Acetylene gas (mfg.) 192
Acetylene gas (whsl.) 541

Assign code 192 to such questionnaire entries as "Acetylene gas factory" and "Acetylene gas plant." Assign code 541 to such entries as "Wholesale acetylene gas company" and "Acetylene gas wholesaling."

C. "Any not listed above" and "exc. . . ."—These words appear in a residual line, usually the line following a list of specific industry titles. The phrase "any not listed above (mfg.)" covers either specified or unspecified kinds of factories not shown in the preceding entries. For example:

Elevators, aircraft (mfg.) 352
Elevators, farm (mfg.) 311
Elevators, any not listed above (mfg.) 312

Assign code 312 to a questionnaire entry of "passenger elevator manufacturing."

The abbreviation "exc." (except) covers all cases except the related entries preceding it. For example:

Apparel knit (mfg.) 132
Apparel, exc. knit (mfg.) 151

Assign code 151 to a questionnaire entry of any apparel manufacturing other than knit, such as "cotton apparel manufacturing."

D. Self-employed, own account, etc.—Some respondents in business for themselves return entries of "self-employed," "own business," "own practice" and the like without any description of the type of business. For many of these cases the industry can be determined from the occupation. The industry list includes a heading "self-employed, with occupation" followed by a list of occupations of self-employed individuals. In this list the occupation code is shown as well as the industry code. The first code is for the industry and the second for the occupation. For example:

Music teacher 860 159

Assign industry code 860 and occupation code 159 to a questionnaire entry of "self-employed music teacher." In this example, it is not necessary to refer to the occupation section of the index.

Occupation Coding

Question 29 on the 1980 Census questionnaire is the primary source for occupation coding. It has two parts: The first asks for "kind of work"; the second, "most important activities or duties." The responses are usually sufficient in assigning an occupation code. Sometimes, however, the coder must first consider the industry (question 28) and class of worker (question 30) relationship to the occupation before assigning an occupation code. (See paragraph C below on class of worker.) Occupation titles are listed in several ways:

A. Occupation titles with no relationships

Economist 166

Assign code 166 to a questionnaire entry of "economist," regardless of other entries.

B. Occupation titles with activities

Painter, house 579

Assign code 579 to a questionnaire entry on kind of work of "painter" or "housepainter" and on most important activities of "painting houses."

C. Occupation titles with industry and/or class of worker relationships

1. Title with one industry code:

Sales agent . . . . . H 253

Assign code 253 to a questionnaire entry of "sales agent" only when the industry code is "H."

2. Title with a range of industry codes:

Service tester 460-462 526

Assign code 526 to a questionnaire entry of "service tester" if the industry code is 461, because code 461 falls within the range 460-462.

3. Title with several industry codes:

Knife setter 121, 130, 160, 231 518

Assign code 518 to a questionnaire entry of "knife setter" only if the industry code is 121, 130, 160, or 231.

4. Title with a questionnaire entry:

Field examiner . .Veterans Administration 922. . 036

Assign code 036 to a questionnaire entry of "field examiner," only if the industry entry is "Veterans Administration," which would be coded 922 (administration of human resources programs).

5. Title with a residual relationship:

Reader . . . . . .Any not listed above 389

Assign code 389 to a questionnaire entry of "reader" when the industry entry falls into a residual category (when none of the listed industries applies) or when the industry question was not answered. Examples of other entries designating residual industry and/or class of worker relationships are: "Mfg., not listed above," "exc. . . . ," and Mfg., exc. . . ."

6. Title with class of worker and industry relationships:

Private duty nurse, practical. . . . .OWN 840 . . . 207

Assign code 207 to a questionnaire entry of "practical nurse, private duty" only when the class of worker entry (question 30) is either "own business not incorporated" or "own business incorporated" and the industry code is 840. Both conditions must be met. Class of worker abbreviations are identified under Class of Worker below.

7. Title with "n.s." with industry restrictions:

Some occupation titles end with the letters "n.s." (not specified). Use these lines when the occupation description is not specific. For example:

Porter, sleeping car 400. 469
Porter, n.s. . . . . J. . . . . .T
Porter, n.s. 400, 420, 421 466
Porter, n.s. 590, 612-622, 750, 751 887

Assign code "T" to a questionnaire entry of "porter" when a respondent has not indicated the most important activities of the job, and the industry code is J.

Coding Industry From Occupation Responses

Some occupations and industries are so related that a missing industry response can be supplied from the occupation response or an incorrectly coded industry can be corrected by reference to the occupation. For example:

A. Title with industry code in parentheses:

Parking lot attendant . . . . . .(750) . . : 813

If the industry is not reported and the occupation is "parking lot attendant," assign industry code (750). The parentheses indicate that the industry was derived from the occupation rather than being supplied by the respondent.

B. Title with industry code in bold type:

Foster mother. **870** 468

Assign occupation code 468 to a questionnaire entry of "foster mother" regardless of the industry code, which must be or be changed to **870**. The bold type indicates that the occupation "foster mother" can only occur in industry 870; no other combination is possible.

CLASS OF WORKER

In addition to asking for industry and occupation, most surveys ask a "class of worker" question; e.g., whether the respondent was salaried or self-employed. Placement in a particular class-of-worker category, is, in most cases, independent of industry and occupation. Question 30 of the 1980 Census questionnaire (reproduced on p. IV) contains seven classes of worker. The coding specialist should make sure that the question has been answered and that it is consistent with the other answers about the respondent's job.

A person who incorporates his own business is technically an employee of that corporation and is tabulated as an employee of a private company.

The class-of-worker entry can aid in coding occupation. The explanation of the class-of-worker abbreviations used in the occupation section of the index follow:

Abbreviation	Class of Worker
PR	Working for a private company, business or individual for wages, salary, or commission
GOV, FGOV, SGOV, LGOV	Working for Federal (including foreign and international), State, or local government
OWN	Working in own business, professional practice, or farm (incorporated and not incorporated)
WP	Working without pay in a family business or farm

SURVEY QUESTIONS NOT REPORTED

Some respondents to surveys do not supply all the requested information. In the 1980 Census, coders did not supply a code for information not provided. However, in computer processing the computer assigned a code to a question left blank using an allocation procedure based on other reported characteristics. In other surveys the allocation procedures might be different or not used. If questions left blank are to be coded, assign code 990 to a blank industry and 999 to a blank occupation.

CENSUS CODING SERVICE

The Bureau of the Census does industry and occupation coding for other government and private agencies on a fee basis. Inquiries about this service should be sent to the Chief, Population Division, Bureau of the Census, Washington, D.C. 20233.

Industrial Classification System

Equivalent numeric codes follow the alphabetic codes. Either code may be used, depending on the processing method. Numbers in parentheses following the industry categories are the SIC definitions. The abbreviation "pt" means "part" and "n.e.c." means "not elsewhere classified."

Occupational Classification System

Equivalent numeric codes follow the alphabetic code. Either code may be used, depending on the processing method. Numbers in parentheses following the occupation categories are the 1977 Standard Occupational Classification code equivalents. The abbreviation "pt" means "part" and "n.e.c." means "not elsewhere classified."
